FS905

SAVEMAN ADVANCE - RESCUE EQUIPMENT

FS905 Saveman Advance is a small and compact self-rescue or remote rescue descender equipment with anti-panic function. Designed for 1 person and for one time use only, this device has a maximum user weight capacity of 125kg. Easy to use, the product comes with a Technora® Ø5mm rope, 2 attached aluminium karabiners, a polyester webbing (25 mm) anchor sling, a vacuum compact bag and an abrasion resistant cover bag. It is extremely easy to carry and install on your harness. It is extremely easy to transport and install in the harness. For greater safety, the system limits impact forces of up to 6kN and also includes an anti-panic function. The Technora® rope is the strongest aramid fibre existing and has a very high heat resistance of 500° C. Therefore can be used in environment where heat and fire may appear. With the vacum bag seal, not only moisture contamination is prevented in the rope, but also saves space and avoids damaging by contact and friction with other components. When the vacuum pack remains intact the lifespan is 10 years.

FS905

SAVEMAN ADVANCE - RESCUE EQUIPMENT

Le FS905 Saveman Advance est un descendeur compact pour l'auto-sauvetage ou le secours à distance, doté d'une fonction anti-panique. Conçu pour une personne et à usage unique, il supporte un poids maximal de 125 kg. Facile d'utilisation, il est fourni avec une corde Technora® de 5 mm de diamètre, deux mousquetons en aluminium, une sangle d'ancrage en polyester de 25 mm, un sac de rangement sous vide et une housse de protection résistante à l'abrasion. Extrêmement facile à transporter et à installer sur un harnais, il offre une sécurité accrue grâce à sa limitation des forces d'impact jusqu'à 6 kN et sa fonction anti-panique. La corde en Technora® est la fibre aramide la plus résistante et supporte une température de 500 °C, ce qui la rend utilisable en milieu chaud et en cas de risque d'incendie. Le sac de rangement sous vide protège la corde de l'humidité, optimise l'espace et évite les dommages dus au contact et au frottement avec d'autres composants. Lorsque l'emballage sous vide reste intact, sa durée de vie est de 10 ans.

FS905

SAVEMAN ADVANCE - RESCUE EQUIPMENT

El FS905 Saveman Advance es un equipo de descenso pequeño y compacto para autorrescate o rescate remoto con función antipánico. Diseñado para una persona y de un solo uso, este dispositivo tiene una capacidad de peso máximo de usuario de 125 kg. Fácil de usar, el producto incluye una cuerda Technora® de Ø5 mm, 2 mosquetones de aluminio incorporados, una cinta de anclaje de poliéster (25 mm), una bolsa compacta al vacío y una funda protectora resistente a la abrasión. Es extremadamente fácil de transportar e instalar en el arnés. Para mayor seguridad, el sistema limita las fuerzas de impacto hasta 6 kN e incluye una función antipánico. La cuerda Technora® es la fibra de aramida más resistente que existe y tiene una altísima resistencia al calor de 500 °C. Por lo tanto, puede utilizarse en entornos donde pueda haber calor y fuego. Gracias al sellado al vacío, no solo se evita la contaminación por humedad en la cuerda, sino que también se ahorra espacio y se evitan daños por contacto y fricción con otros componentes. Cuando el envase al vacío permanece intacto, su vida útil es de 10 años.

FS905

SAVEMAN ADVANCE - RESCUE EQUIPMENT

FS905 Saveman Advance é um pequeno e compacto equipamento de auto-resgate ou descensor de resgate remoto com função anti-pânico. Projetado para 1 pessoa e para uso único, este dispositivo tem uma capacidade máxima de peso do utilizador de 125 kg. Fácil de usar, o produto vem com uma corda Technora® Ø5mm, 2 mosquetões de alumínio acoplados, uma cinta de ancoragem de poliéster (25 mm), um saco a vácuo e um saco de cobertura resistente à abrasão. É extremamente fácil de transportar e instalar no arnês. Para maior segurança o sistema limta forças de impacto até 6kN, incluindo também uma função anti-pânico.
A corda Technora® é a fibra de aramida mais forte existente e tem uma resistência muito alta ao calor de 500° C. Portanto, pode ser usada em ambientes onde calor e fogo podem aparecer. Com a vedação do saco a vácuo, não apenas a contaminação por humidade é evitada na corda , mas também economiza espaço e evita danos por contato e fricção com outros componentes. Quando a embalagem a vácuo permanece intacta, a vida útil é de 10 anos.
